

ROLE PROFILE – SENIOR MINING ENGINEER AND DIRECTOR

Reports to: Managing Director

Overview

This dual role encompasses responsibilities as a Director and Mining Engineer, directly aligning with the organisation's strategic goals and supporting the Managing Director in achieving exceptional outcomes. The role requires leading mining-related projects and overseeing technical matters while advancing business opportunities within the UK and internationally. A commitment to safety, risk reduction and fostering a culture of integrity and excellence is central to this position.

Key Focus Areas

Director Responsibilities:

- Support the Managing Director by delivering on organisational goals and strategies.
- Actively contribute to the alignment of resources to meet strategic objectives and ensure stakeholder engagement in an open and constructive manner.
- Maintain structured feedback mechanisms across all stakeholders using a Plan, Do, Check, Act framework to uphold the highest level of Corporate Governance.
- Promote and sustain the organisation's reputation through a culture of integrity and achievement, ensuring robust delivery of Competent Mining People Solutions.

Mining Engineer Responsibilities:

- Take the lead on projects associated with mining client needs, ensuring the delivery of technical excellence.
- Drive the development of new business opportunities in the Mining Sector, both locally in the UK and in international markets.
- Oversee all technical aspects related to the mining sector business, ensuring compliance with industry standards and addressing client-specific requirements.
- Implement and ensure adherence to safe practices, reducing operational risks by strengthening controls.
- Deliver proven case studies that showcase mining competence and support the transition of expertise across international boundaries.

Key Objectives

- Unwavering commitment to Health, Safety, and Environmental stewardship, establishing the organisation as a leader in the sector.
- Facilitate UK sector growth as a foundation for international development while identifying key geographies and focus areas for strategic expansion.
- Ensure the delivery of mining projects with excellence, on time, and within budget while maintaining the highest safety standards.
